

Stay on top of your **compliance controls.**

The Secberus platform provides an accurate and up-to-date assessment of your cloud environment's compliance status—anytime you need it. Allowing your compliance team to manage and audit regulatory compliance technical security controls at the speed of business.

Platform Capabilities

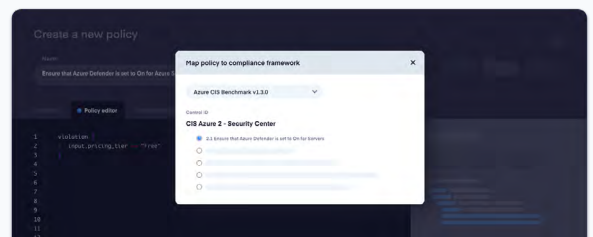

Real-Time Dashboard

The Secberus out-of-box compliance dashboard allows you to view key metrics of your cloud environments and applications across all business units that are not currently compliant. This allows your governance team to take immediate action. And Secberus technology is built to show how these resources perform over time so you can track and monitor current data today and trends month over month.

Dynamic Mapping

Secberus offers built-in and out-of-the-box compliance frameworks like HIPAA, CIS, and ISO 27002. It also provides the ability to dynamically map any custom policies or controls to any framework's compliance requirement.

One-click Reporting

Secberus platform offers in-depth and accurate compliance posture reports of any cloud environment, application, and business unit. Easily download and filter reports to show proof of your compliance across industry standards and benchmarks. The reporting feature also allows you to schedule automated reports to be sent to the right team at the right time.

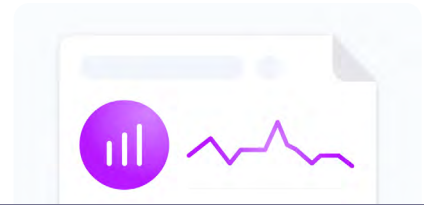

The screenshot shows a detailed compliance report for the 'CIS Azure Foundations Benchmark'. It displays a 100% compliance rate and a table of controls with their status, passing counts, and violations.

Status	Controls	Passing	Policies	Violations
Pass	1. CIS Azure 1 - Identity and Access Management	3/2	2	0
Pass	1.1 Ensure that multi-factor authentication is enabled for all privileged users	3/2	2	0

Platform Benefits

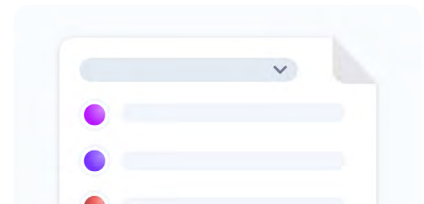

Continuous Monitoring and Visibility

Invite your compliance team to gain 24/7 access to continuous cloud compliance monitoring without blocking your development team.

Automated Workflows

Leverage Secberus automation engine allowing your team to create any business or process workflows to speed up time to remediate compliance violations.

Accurate Assessments

Leverage Secberus core technology (Policy-as-Code) to accurately assess compliance controls in real-time. Provide both compliance trends and real-time compliance status of your cloud environment(s) to whoever needs it, whenever they need it.

Secberus supports the following security compliance standards and regulations.

CIS Benchmarks • FedRAMP Low Impact • HITRUST Level 1 • HIPAA • ISO 27001 • PCI DSS v3.2 • SOC 2
